RE: 2016 Solid Waste Management Plan

Harper County Board of Commissioners,

I would like to ask the board for their approval of the 2016 SWMP Annual Review. I have included the following for your review;

- The Annual Plan Review
- A list of the current members
- Member signed approval/disapproval forms of the review
- A 2015/2016 comparison report
- A goals and results sheet

There are no recommended changes to the current plan. If you approve, please make a motion in your meeting indicating your action. I am required to send a copy of the minutes to the state.

Thank you,

Mike Feist
Harper County Solid Waste Manager

2016 SWM Plan Annual Review

As a committee we are required to review the SWM plan annually. For the annual review I will send out an update, like this one, each year in May for your review & approval. We also are required to hold a meeting every 5 years to review the SWM 5-year plan. The next 5-year meeting will be in June of 2017 and I will notify each of you when that date is set.

The current committee members are; Brian Waldschmidt, Greg Cleveland, Howard Hatfield, Nick Jacobs, Danny Wyatt, Darrel Trantham, Nathan Davis, Doug Morris, Rob Fadden and myself. We welcome our new members, Rob Fadden, Plumb Thicket Landfill Manager and Doug Morris, Recycling Coordinator at the Harper County Landfill. I thank you all for taking the time to serve on this committee.

The following is a brief update to bring you current as we come to the close of another plan year.

Our new Bobcat Skid Steer Loader will be delivered in June this year. This is a government contract for 1-year with White Star of Wichita, Kansas.

As reported in the 2015 Annual Review, we received a 2006 Sterling Dump Truck from the Road & Bridge Department. Having the truck has allowed us to clean out the leachate pond and use that dirt as cover for the C/D pit.

In 2015, we started the expansion of the C/D cell by building a berm around a section of the existing cell. This will allow us to extend the height of the cell as determined by KDHE with final approval coming from Tony Mellini, Project Manager for Terracon. The expansion will be completed sometime in 2016.

The majority of dirt for the berm came to the landfill as contaminated dirt from a salt water pipeline leak 7- miles east of Anthony and just south of Highway 44. We not only are able to use this dirt as needed cover for our cells but also generate income by accepting it as waste.

Tire piles are still a problem. Our spring cleanup netted 10,700 pounds of tires or approximately 362 tires. This included some that were charged at the current rate from businesses.

The recycling program is going well with cardboard still being the most popular item to be recycled. In 2015 we lost a dedicated volunteer, Robert Worthington. Robert will be greatly missed by all. His dedication to recycling will stand as a tribute to his service.

There are no changes to the SW Management Plan for 2016. After reviewing this update please sign the attached signature page indicating your recommendation to the Board of Harper County Commissioners.

Thank you for your time and cooperation.

Mike Feist

GOALS & RESULTS

2015 GOALS

1. Improve drainage in landfill area.
2. Purchase a riding mower to keep the entrance road mowed.
3. Get the Ford Tractor fixed so we can use it to mow.
4. Purchase more asphalt for the entrance road.
6. Increase recycling county-wide with monthly drop off spots.

RESULTS

Installed 4 culverts & made drainage ditches to improve drainage in the working area. We still have 2 more culverts to put in place.

We still have to depend on the county mowers to keep things mowed.

After checking the Ford Tractor for repair needs, Jim Thompson said the repairs would be more than the tractor is worth. We have a 12' mower but nothing to pull it.

Funds were not available to asphalt the entrance road.

Recycling has increased at the drop center. More is coming in from Kiowa & Clearwater, but they are both selling their own cardboard and aluminum.

We are in the final stages for approval of the expanded C/D cell. Everything has been turned over to KDHE by Terracon.
